

Docker

Dockerfile (cont'd)

```
# Create app folder
WORKDIR /go/src/app

# Install and cache dependencies
COPY go.mod .
COPY go.sum .
RUN go mod download
```

Docker

Dockerfile (cont'd)

```
# Copy app files into container
```

```
COPY . .
```

```
# Build the app
```

```
RUN CGO_ENABLED=0 GOOS=linux GOARCH=amd64 \  
    go build -o main
```

```
# Run the app
```

```
ENTRYPOINT [ "/go/src/app/main" ]
```
