

Docker

Multi-Stage Dockerfile: Stage 1 (builder)

```
# Base container image
FROM golang:1.14-alpine AS builder

# Create app folder
WORKDIR /go/src/app

# ...

ENTRYPOINT [ "/go/src/app/main" ]
```

Docker

Multi-Stage Dockerfile: Stage 2

```
# Smallest container image
FROM scratch

# Copy built executable from base image to here
COPY --from=builder /go/src/app/main /

# Run the app
ENTRYPOINT [ "/main" ]
```
