VI. Processes

"Execute the app as one or more **stateless** processes"

VI. Processes

What is a process?

- During development, the code is usually run as a **single process** that is launched via the command line.

- On the other hand, a **production deployment** of a sophisticated app may be instantiated into one or more running processes.

The Twelve-Factor App

I. Codebase

II. Dependencies

III. Config

IV. Backing Services

V. Build, Release, Run

VI. Processes

VII. Port Binding

VIII. Concurrency

IX. Disposability

X. Dev/Prod Parity

XI. Logs

XII. Admin Processes
