Docker

Dockerfile (cont'd)

```
# Create app folder
WORKDIR /go/src/app

# Install and cache dependencies
COPY go.mod .
COPY go.sum .
RUN go mod download
```

Docker

Dockerfile (cont'd)

```
# Copy app files into container
COPY . .

# Build the app
RUN CGO_ENABLED=0 GOOS=linux GOARCH=amd64 \
    go build -o main

# Run the app
ENTRYPOINT [ "/go/src/app/main" ]
```
