Git

Charactaristic	Description
Pluggable Merge Strategies	• It has a well-defined model of an incomplete merge. • It also has multiple algorithms for completing it; manually or automatically.
Garbage Accumulation	• It performs automatic garbage collection when enough loose objects has been created. • oIt also can be done explicitly.

Git

Charactaristic	Description
Periodic Explicit Period Packing	• It uses packs to store a large number of compressed objects in one file called packfile. • New objects are created as single objects until repacking. • It does periodic repacking automatically, but also can be done implicitly manually.
